

# CHEVRON

*Polyurethane Scraper*

The **Tru-Trac Chevron Polyurethane belt scraper** is specially designed to clean Chevron belts. The unique flexible Polyurethane fingers are embedded with steel tips, which uses a pulsating flicking action to clean the belt.

Effective Secondary **Chevron Belt Scraper**

- **Designed for all chevron belts** - works on different types of chevron belts, on both clipped and vulcanised joints;
- **Self-Adjusting** - the flexible polyurethane fingers automatically adjust to the belt surface to clean in between the chevron cleats;
- **Low Maintenance** - the flexible design ensures that no build-up occurs on the blades, unlike brush scrapers which require continual cleaning;
- **Quick Change Blade** - change out quick release cartridge system is a one-minute operation allowing for quick maintenance;
- **Tensioned** - using the Bolt-Up™ tensioner for constant blade pressure, reducing blade retensioning maintenance and ensuring high cleaning efficiency.
