

# SLIDER TROUGH FRAME

## Easy Maintenance Trough Frame

Tru-Trac Slider Trough Frame gives you the ability to change troughing rolls under the conveyor without having to lift the belt or remove adjacent belt idlers frame. It is designed to fit into tight or confined spaces, ensuring proper belt rolling support and ease of change out.

- Quick Maintenance:** sliding mechanism allows for quick and easy access to change worn idlers.
- Perfect for Confined Spaces:** the compact inline design allows the unit to be installed and maintained in hard to access areas.
- Rugged design:** heavy duty design can be installed under loading chutes
- Corrosion Protection:** the entire frame is Hot Dipped Galvanised to provide corrosion protection throughout the lifespan of the Slider Frame.

The frame dimension: 150mm wide

Compatible with Idlers: 127mm or 150mm  
and Impact Idlers: 133mm and 159mm

*Rollers slide out for easy removal*
